

AMIT KUMAR

Data Scientist

+91 98XXXXXX10 | amit.kumar@email.com | Bangaluru | LinkedIn | GitHub

PROFILE SUMMARY

Data Scientist with 2 years of experience across Healthcare and Retail industries. Started as a Junior Data Scientist building analytical pipelines and dashboards, and moved into end-to-end model development covering everything from data preparation and feature engineering to model training, evaluation, and deployment. Comfortable working with cross-functional teams, translating messy business problems into data solutions, and presenting findings to non-technical stakeholders. Strong hands-on experience in Python, SQL, machine learning, and data storytelling.

EXPERIENCE

Data Scientist | MedVision Analytics Pvt. Ltd., Bangaluru

Jan 2023 – Present | 1 Year+

Industry: Healthcare

Roles & Responsibilities:

- Built a patient readmission prediction model on 1.5 lakh+ hospital discharge records handled class imbalance, engineered clinical features, and trained XGBoost and LightGBM models. AUC-ROC of 0.89.
- Developed a monthly disease risk scoring pipeline on patient vitals and lab reports output fed directly into the clinical dashboard used by doctors.
- Automated data preprocessing workflows in Python covering missing value treatment, outlier handling, and feature normalization across multiple hospital data sources.
- Worked closely with the clinical team and product managers to translate healthcare workflows into model features and evaluation logic.
- Built a Streamlit tool for the clinical ops team to run risk scores on new patient batches independently reduced dependency on the data team.
- Tracked all model experiments in MLflow maintained versioning, parameter logs, and performance history across iterations.

Key Project:

Patient Readmission Prediction EHR data, LightGBM model, SHAP for explainability, deployed via Streamlit. AUC-ROC: 0.89.

Junior Data Scientist | RetailSense Technologies, Pune

Jan 2022 – Dec 2022 | 1 Year

Industry: Retail

Roles & Responsibilities:

- Performed end-to-end exploratory data analysis** on retail sales and customer transaction data identified seasonality patterns, top-performing SKUs, and regional sales trends that directly informed quarterly business strategy.
- Built a product recommendation engine** using collaborative filtering on customer purchase history integrated into the company's e-commerce platform and improved average order value by 12%.
- Developed customer churn prediction model** using Logistic Regression and Random Forest on 80,000+ customer records achieved 85% accuracy. Output shared weekly with the retention marketing team for targeted outreach.
- Wrote complex SQL queries** to extract, join, and aggregate data from multiple retail databases automated weekly and monthly reporting that previously took the team 2 days manually.
- Created Power BI dashboards** for category managers showing sales performance, return rates, and inventory movement used daily for operational decisions.
- Collaborated with the marketing and supply chain teams** to define KPIs, validate data logic, and ensure dashboard numbers matched ground reality.

Key Project:

- **Customer Churn Prediction** — Built on retail transaction data. Feature engineering on purchase recency, frequency, returns, and discount usage. Random Forest model with 85% accuracy. Predictions delivered weekly to the CRM team via automated Python script.

SKILLS

Core Data Science Skills:

Predictive Modelling:	Classification, Regression, Clustering, Time Series Forecasting
Feature Engineering:	RFM Analysis, Encoding, Normalization, Outlier Treatment
Model Evaluation:	AUC-ROC, Precision-Recall, F1-Score, Confusion Matrix, Cross-Validation
EDA & Analytics:	Statistical Analysis, Hypothesis Testing, Funnel Analysis
Data Wrangling:	Missing Value Treatment, Data Cleaning, Merging, Reshaping, Aggregation
Storytelling:	Translating model outputs into business insights for non-technical stakeholders

Tools & Technologies:

Languages:	Python, SQL, R (basic)
ML Libraries:	Scikit-learn, XGBoost, LightGBM, TensorFlow, HuggingFace, Pandas, NumPy
Visualization:	Power BI, Tableau, Matplotlib, Seaborn
Databases:	MySQL, PostgreSQL, MongoDB (basic)

EDUCATION

B.E. — Computer Science Savitribai Phule Pune University	2021
---	------

CERTIFICATIONS

• Google Data Analytics Professional Certificate (Google / Coursera)	2021
• Machine Learning Specialization (DeepLearning.AI / Coursera)	2021

LANGUAGES

English | Hindi | Marathi
